DETAILED ACTION

Response to Arguments

Regarding Claims 4, 5 and 8-10 applicant's arguments, filed 6/3/2005, been fully considered and are persuasive. Examiner withdraws non-final rejection previously issued on claims 4, 5 and 8-10.

Regarding Claims 1 and 3, applicant's arguments, filed 6/3/2005, been fully considered and are not persuasive. Claims 17, 21 and 23 of 10/872915 application discloses the required coupling of the antiferromagnetic layer.

Allowable Subject Matter

1. Claims 2 and 4-14 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 2826

3. Claims 1 and 3 provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 17, 21, 23, 29 and 30 of copending Application No. 10/872915. Although the conflicting claims are not identical, they are not patentably distinct from each other because they both disclose a method for forming MTJ memory structure comprising providing a substrate, forming a multilayered magnetic tunneling junction structure on the magnetic layer further comprising forming a seed layer on the substrate, forming antiferromagnetic layer on the seed layer, forming a synthetic antiferromagnetic pinned layer on the antiferromagnetic layer, forming tunneling barrier layer, forming ferromagnetic layer on the tunneling barrier layer, forming ferromagnetic free layer, forming capping layer, annealing multilayer MTJ structure, producing a magnetic anisotropy in ferromagnetic free layer and patterning multilayered MTJ structure to create circular/elliptical cross sectional shape.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
